

Jitin Nair

LEARNING & DEVELOPMENT LEADER · AI-ENABLED L&D ARCHITECT

not.jitin@gmail.com +91 90088 98642 Bangalore, India linkedin.com/in/notjitin jitinnair.com

PROFESSIONAL SUMMARY

L&D leader with 10+ years designing learning architectures that move measurable business outcomes. Built and led programmes across global financial services and consulting organisations — cutting training time by 70%, saving \$140K+ in costs, and achieving 90%+ completion on complex curricula. Now architecting AI-native L&D platforms that compress the discovery-to-delivery cycle from weeks to minutes while preserving the expert-led quality standards that make programmes actually work. Uniquely positioned at the intersection of instructional science and AI systems engineering.

5K+ LEARNERS TRAINED	70% TRAINING TIME REDUCTION	\$140K+ TRAINING COST SAVED	90%+ COURSE COMPLETION RATE	60% PRODUCTION EFFICIENCY GAIN

PROFESSIONAL EXPERIENCE

AI-Enabled L&D Architect & Platform Designer

Mar 2025 – Present

Independent Consultant · Bangalore, India

- Architected **Smartslate**, an AI-native L&D platform compressing full programme discovery and design from weeks to under 45 seconds — with human-in-the-loop validation at every stage to maintain expert-level quality.
- Built a 7-stage contextual discovery pipeline integrating Claude, ChatGPT, and Perplexity, running 500+ automated daily jobs across client learning briefs while keeping instructional integrity non-negotiable.
- Designed scalable L&D orchestration infrastructure enabling teams to deliver bespoke learning strategies at volume, without proportional headcount growth.
- Applied learning science frameworks (ADDIE, Bloom's Taxonomy, performance mapping) as the design backbone of an AI system — ensuring outputs are pedagogically sound, not just technically impressive.

Instructional Designer

Sep 2022 – Mar 2025

Moody's Ratings · Bangalore, India (Global Remit)

- Led video-based learning development for a global credit ratings agency, creating standardised templates and automated production workflows that served international teams across multiple business units.
- Reduced content production time by **60%** through systematic automation and template standardisation — enabling faster programme cycles without sacrificing quality or compliance.
- Achieved **90%+ module completion rates** on complex financial curriculum by applying adult learning principles, chunked content design, and iterative stakeholder feedback loops.
- Built scalable content pipelines that removed single-point dependencies, enabling the team to absorb increased demand without linear headcount expansion.

Instructor Analyst → Senior Analyst

Jan 2019 – Sep 2022

Accenture · Bangalore, India (F&A · HRO · New Joiner Portfolio)

- Owned L&D for **300+ employees across 16 client teams**, conducting training needs analyses (TNA) and delivering modality-matched interventions — ILT, video, e-learning, and gamification.
- Designed New Joiner Training with 4 modules, 20+ topics, and 50+ assessments; adopted as the standard onboarding programme across the full F&A and HRO portfolio.
- Delivered a hybrid blended learning model for an F&A client reducing learning time by **70% while maintaining 54% knowledge retention** — saving ~\$80K in training costs.
- Built a second upskilling model for an HRO client achieving retention parity at an additional ~\$60K in savings (total: **\$140K+ across both programmes**).
- Engineered a 1,400-line VBA automation suite for pan-India TNA audits — automating pivot tables, charts, and feedback emails and eliminating weeks of manual reporting across the network.

Senior Executive — Operations & Training

May 2015 – Dec 2017

[24]7.ai · Bangalore, India

- Managed back-end customer operations for a US retail and e-commerce client; ran new joiner training, QA programmes, and refresher sessions to maintain team performance above benchmark.
- Recognised as **top performer three consecutive months**; identified for a leadership development track within 24 months of joining — the fastest accelerated path available.

Smartslate · AI-Native L&D Platform

Lead Architect & L&D Designer · [smartslate.io](#)

AI-first platform that automates the entire L&D lifecycle — from contextual discovery through curriculum design and delivery — with expert validation built into every stage. Purpose-built to scale instructional design output without diluting design quality.

- Generates tailored learning blueprints in **45 seconds** via a 7-stage AI discovery pipeline (vs. traditional 2–4 week design sprints)
- Runs **500+ automated background jobs daily** across active learning programmes with zero manual intervention
- Multi-provider AI integration (Claude, ChatGPT, Perplexity) with human-in-the-loop quality checkpoints at every stage boundary
- Designed to Kirkpatrick Level 4 measurement standards — every output maps to a stated business metric

Stack: Next.js · Supabase · Claude · ChatGPT · Perplexity · PostgreSQL
