PROFESSIONAL SUMMARY

L&D leader with **10+ years** designing learning architectures that move measurable business outcomes. Built and led programmes across **global financial services and consulting organisations** — cutting training time by **70%**, saving **\$140K+ in costs**, and achieving **90%+ completion** on complex curricula. Now architecting AI-native L&D platforms that compress the discovery-to-delivery cycle from weeks to minutes, while preserving the expert-led quality standards that make programmes actually work. Uniquely positioned at the intersection of instructional science and AI systems engineering.

PROFESSIONAL EXPERIENCE

AI-Enabled L&D Architect & Platform Designer

Mar 2025 – Present

Independent Consultant · Bangalore, India

- Architected **Smartslate**, an AI-native L&D platform that compresses full programme discovery and design from weeks to **under 45 seconds** — with human-in-the-loop validation at every stage to preserve instructional rigour.
- Built a **7-stage contextual discovery pipeline** integrating Claude, ChatGPT, and Perplexity, running **500+ automated daily jobs** across client learning briefs while keeping instructional integrity non-negotiable.
- Applied **ADDIE, Bloom's Taxonomy, and performance-mapping frameworks** as the design backbone of an AI system — ensuring outputs are pedagogically sound, not just technically impressive.
- Designed scalable L&D orchestration infrastructure enabling teams to deliver bespoke learning strategies at volume, **without proportional headcount growth**.

Instructional Designer

Sep 2022 – Mar 2025

Moody's Ratings · Bangalore, India (Global Remit)

- Led video-based learning development for a **global credit ratings agency**, creating standardised templates and automated production workflows serving international teams across multiple business units.
- Reduced content production time by **60%** through systematic automation and template standardisation — enabling faster programme cycles without sacrificing quality or compliance standards.
- Achieved **90%+ module completion rates** on complex financial curriculum by applying adult learning principles, chunked content design, and iterative stakeholder feedback loops.
- Built scalable content pipelines that removed single-point dependencies, enabling the team to absorb increased demand **without linear headcount expansion**.

Instructor Analyst → Senior Analyst

Jan 2019 – Sep 2022

Accenture · Bangalore, India (F&A · HRO · New Joiner Portfolio)

- Owned L&D for **300+ employees across 16 client teams**, conducting training needs analyses (TNA) and delivering modality-matched interventions — ILT, video, e-learning, and gamification.
- Designed New Joiner Training with **4 modules, 20+ topics, and 50+ assessments**; adopted as the standard onboarding programme across the full F&A and HRO portfolio.
- Delivered a blended learning model for an F&A client reducing learning time by **70%** while maintaining **54% knowledge retention** — saving **~\$80K** in training costs through hybrid design.
- Built a second upskilling model for an HRO client achieving retention parity with an additional **~\$60K** in savings — total **\$140K+ cost avoided** across both programmes.
- Engineered a **1,400-line VBA automation suite** for pan-India TNA audits — automating pivot tables, charts, and feedback emails across the network and eliminating weeks of manual reporting overhead.

Senior Executive — Operations & Training

May 2015 – Dec 2017

[24]7.ai · Bangalore, India

- Managed back-end operations for a US retail and e-commerce client; ran **new joiner training, QA programmes, and refresher sessions** maintaining team performance consistently above benchmark.
- Recognised as **top performer three consecutive months**; identified for a leadership development track within 24 months — the fastest accelerated path available.

FEATURED PLATFORM

Smartslate · AI-Native L&D Platform

Lead Architect & L&D Designer · [smartslate.io](#)

AI-first platform automating the entire L&D lifecycle — contextual discovery through curriculum delivery — with expert validation built into every stage. Purpose-built to scale instructional design output without diluting quality or pedagogy.

- Generates tailored learning blueprints in **45 seconds** via a 7-stage AI discovery pipeline (vs. traditional 2–4 week design sprints)
- Runs **500+ automated background jobs daily** across active client programmes with zero manual intervention required
- Multi-provider AI (Claude, ChatGPT, Perplexity) with **human-in-the-loop quality checkpoints** at every stage boundary
- Designed to **Kirkpatrick Level 4 measurement standards** — every output maps to a stated business metric

Stack: Next.js · Supabase · Claude · ChatGPT · Perplexity · PostgreSQL
